1/ Professor of Agricultural Economics, Economist in the Agricultural Experiment Station and on the Giannini Foundation.

The author gratefully acknowledges valuable aid from the Bureau of Markets, Division of Marketing, California Department of Agriculture. Mr. J. F. Bennett, Assistant Chief of the Bureau of Markets, reviewed a draft of the handbook and made constructive suggestions. Acknowledgment is also made for assistance by Donald G. Larson, Research Assistant on the Giannini Foundation, who aided in checking the order specifications with source materials in the author's files and in those of the Giannini Foundation Library. The author carries sole responsibility for the handbook as here presented; he will appreciate any omissions or errors brought to his attention.

CALIFORNIA AGRICULTURAL MARKETING PROGRAMS--
HANDBOOK OF COMMODITY PROGRAM SPECIFICATIONS

Introduction

Since the enactment of the California Agricultural Prorate Act of 1933, a substantial number of agricultural industries in the state have initiated marketing programs under the state legislation. During the past quarter century, a wide range of agricultural industries and products have experienced operations enabled by the state legislation. The nature of the programs has undergone change in relative emphasis, and also, during the past 25 years, the state legislation has developed.

To note and bring together in a single place for operating purposes as well as research use the various California marketing orders which have been initiated, they are set forth, each program separately, in the following pages. For each program, its major identifications and specifications are summarized. Thus, by reference to the sheet for a particular commodity program, one may have for convenient reference the program's legislative authority; the effective date of the program and the dates of its amendments; the authorized area of application of the program; its authorized marketing provisions; the seasons when the program has been in operation; and the termination date of the program if it has been terminated. Such specifications may often indicate the answer sought by one making inquiry concerning a particular program. If the question is more detailed than what is summarized for the commodity program, the listed specifications are helpful in crystallizing more specific inquiry at appropriate sources. The authoritative and definitive source for such detailed inquiry is at the Bureau of Markets, Division of Marketing, California Department of Agriculture.

This handbook of commodity program specifications for California marketing orders may be of particular interest to those who wish to learn of "earlier programs" for particular commodities. During the past quarter century, there has been considerable turnover in the personnel of growers and processors in the state. It is not unusual that some now active in a particular industry are not familiar with its earlier history and experience, if any, with marketing orders. For such individuals, the handbook may serve as a source for introductory inquiry which may then be supplemented by more intensive investigation.

Those readers or users interested in the authorized provisions of particular commodity programs may note that, on the specification sheets for some of the commodities, various provisions are listed. For example, the order for "Peaches, canning and freezing cling" (page 48) shows a number of authorized provisions. Their listing in that manner does not mean that all of those provisions were effective during all of the years the cling peach order has been effective. The provisions listed reflect the development of the order over the whole series of years from when the order first became effective to the present. For instance, the 1939 program was concerned with grading and inspection and with diversion of cling peaches only with respect to culls; advertising and promotion were included in the original order but were dropped shortly thereafter only to be included again in 1946--also when grade and size control was introduced; in 1950 the provision was added for volume control through "green dropping" of immature fruit; and in 1952 provisions were added for a stabilization fund and diversion to other peach-using products. Such developments in the cling peach order over the years are reflected in the various amendments, the dates of which are noted on the specification sheet and which should be referred to in order to determine the particular provisions authorized for particular years.

The commodity program specifications given in the following pages have been summarized from materials in the files of the author. The reference files of the Giannini Foundation Library were also consulted and checked to uncover omissions or incomplete specifications. Thus, the author believes that the handbook includes a reasonably complete summary of the specifications of California commodity programs initiated during the period ending June 30, 1957. The author would be pleased to learn of omissions or corrections which should be taken account of in the handbook.

Enabling Legislation

To provide a brief account of the California enabling legislation, under the authority of which the marketing programs have been initiated, the following summary is presented. (The state legislation for milk marketing and pricing and the corresponding program specifications are not included in this handbook.)

The "Agricultural Prorate Act of 1933" was the first in a series of legislative enactments designed to deal with what is commonly referred to as the "orderly marketing" of California-produced agricultural commodities. Under provisions incorporated in this and subsequent marketing laws, agricultural industries in the state can adopt programs utilizing certain types of marketing regulations. Two types of programs are authorized under these marketing laws. One is the "marketing order." With an industry's adoption of this type of program, the state may exercise its police power, to enforce regulations pursuant to the "order," on all participants in the industry. The second type of program, known as a "marketing agreement," provides for voluntary agreements between the State Director of Agriculture and individual producers or handlers of an agricultural commodity. The provisions of a "marketing agreement" program are applicable only to the particular individuals who have entered into

the agreement. All but one of the state programs currently in operation are of the "marketing order" type.

The California marketing legislation which has been developed over the years can be classified into three main categories. These are (1) "Agricultural Prorate Acts" which apply principally to producers, (2) "California Agricultural Adjustment Acts" with regulations applying only to handlers, and (3) a broader type of marketing legislation known as the "California Marketing Act" which is applicable to producers or to handlers (including processors) or to both producers and handlers.

The first prorate law to become effective in California was the "Agricultural Prorate Act of 1933." Its basic regulatory provision was to provide surplus control measures similar to those which many cooperative associations had been attempting to operate on a voluntary basis. Through the years, the original Act of 1933 has been amended many times. An amendment in 1939 transferred the administration of the law from the Agricultural Prorate Commission to the State Department of Agriculture. After 1945 the "Agricultural Prorate Act" was called the "Agricultural Producers Marketing Act," and in 1953 the statute was made a part of the Agricultural Code (Chapter 11, Division 6) and designated as the "Agricultural Producers Marketing Law." All marketing programs receiving their authority from this law have been operated by and on behalf of producers. However, some of the early programs did provide for inclusion on the program committee handler members not to exceed three in number, but program regulations did not apply to handlers as such. At present, the provisions of the law are similar in most respects to the "Agricultural Marketing Act of 1937" (as amended). The essential difference is its applicability only to producers. The only program currently in operation receiving its authority from the "Agricultural Producers Marketing Law" is the "Canning Bartlett Pears Program."

Also in 1933, a "California Agricultural Adjustment Act" was passed by the California legislature. This Act was replaced two years later by another statute of the same name. The 1935 Act was then succeeded by the "California Agricultural Products Marketing Acts" of 1937 and 1943 (Chapters 12 and 13, respectively, Division 6 of the Agricultural Code). These laws differed from the "prorate laws" in that their provisions applied only to handlers instead of principally to producers. The commodities that were regulated by marketing orders since 1935 were restricted to those commodities for which a federal marketing order or agreement was also in effect. State marketing orders provided for intrastate regulations while the federal programs were concerned with interstate commerce. The most recent commodity to be covered by a state marketing order under this legislation was walnuts. That order was terminated in 1954 because provisions of the federal order were extended to include the regulation of intrastate as well as interstate commerce in walnuts.

The first act to incorporate provisions applying to either producers or handlers or both was the "California Marketing Agreement Act of 1935." This law was succeeded in 1937 by the "Processed Foodstuffs Marketing Act" and the "California Marketing Act of 1937." The "Processed Foodstuffs Marketing Act" authorizes programs regulating the marketing by processors of processed agricultural commodities. One marketing order, macaroni products, was established for two years (1938-39) under authority of this Act. Since termination of this order in 1939, no industry has made use of the statute.

The "California Marketing Act of 1937" (as amended) provides the authority for all but one of the marketing programs currently in operation in the state (the only exception is the producer program for canning Bartlett pears, which is administered under authority of the "Agricultural Producers Marketing Law"). The "California Marketing Act of 1937" (as amended) enabling legislation, covering producers and/or handlers, provides a variety of provisions including market

volume control, grading and inspection, advertising and sales promotion, prohibition of unfair trade practices, and research studies.

California Agricultural Marketing Programs

Commodity: Apples, Gravenstein

Legislative authority: Agricultural Prorate Act of 1933

Effective date: April 28, 1934

Effective dates of amendments:

Area of application: Prorate zone no. 1
Napa and Sonoma counties

Authorized provisions: Proration of producers picking and shipping (generally weekly prorate) to specified percentage of estimated available supply

Seasons in operation: 1934, 1936, and 1937

Termination date: May 25, 1938

California Agricultural Marketing Programs

Commodity: Apples, early (Note: Early apples defined as Gravenstein apples and other varieties are produced in California and normally sold prior to August 1.)

Legislative authority: California Marketing Act of 1937

Effective date: June 28, 1948

Effective dates of amendments: Minor amendment: March 29, 1954

Area of application: State

Authorized provisions:
Market volume control
Grade regulations including standards of maturity
Size regulations
Pack and container regulations
Mandatory inspection
Advertising and sales promotion
Production, processing, or marketing research

Note: The authorized provisions listed above for this commodity program include all of the provisions developed and included at one time or another during the interim period from the effective date of the program to the present date. To determine the provisions authorized for a particular year or season, it is necessary to refer to the program or programs operating for that year or season under the corresponding effective dates of the program and amendment.

Seasons in operation: Continuously beginning with 1948

Termination date: Continuous

California Agricultural Marketing Programs

Commodity:	Artichokes
Legislative authority:	Agricultural Prorate Act of 1933
Effective date:	September 24, 1934
Effective dates of amendments:	
Area of application:	Prorate zone no. 1 Santa Cruz, Marin, San Mateo, Monterey, and San Luis Obispo counties
Authorized provisions:	Proration of producers culling and shipping (during specified periods) to a specified percentage of estimated available supply
Seasons in operation:	None (Not made operative because of improved markets)
Termination date:	Not made operative

California Agricultural Marketing Programs

Commodity: Asparagus, canning

Legislative authority: Agricultural Prorate Act of 1933; after 1945, Agricultural Producers Marketing Act

Effective date: April 8, 1938

Effective dates of amendments: April 5, 1939 and June 20, 1940
Minor amendment: June 13, 1953

Area of application: Prorate zone no. 1
Sutter, Yolo, Solano, Sacramento, Contra Costa, and San Joaquin counties

Authorized provisions: Control of maximum quantity to be canned in any one season
Setting of a closing date for delivery of asparagus for canning
Grades for canning asparagus

Note: The authorized provisions listed above for this commodity program include all of the provisions developed and included at one time or another during the interim period from the effective date of the program to the present date. To determine the provisions authorized for a particular year or season, it is necessary to refer to the program or programs operating for that year or season under the corresponding effective dates of the program and amendments.

Seasons in operation: 1938-1942, inclusive, and 1953

Termination date: Inactive after 1953

Commodity: Cantaloupes, honey ball and honeydew melons (Note: Operated jointly with parallel federal marketing order.)

Legislative authority: California Agricultural Adjustment Act of 1935 and California Agricultural Products Marketing Act of 1937

Effective date: May 27, 1938

Effective dates of amendments:

Area of application: Imperial County

Authorized provisions: Market volume control of shipments by sizes

Seasons in operation: 1938

Termination date: July 31, 1938

Operation Description Worksheet Template

Operation:

Description: (Write: 1 General Objective with Specific Criteria, Measurable Standard, Time Limit, Condition, Behavior)

Instructional Method: Demonstration, Practice, Feedback, Reinforcement

Instructional Aids: Worksheet, Checklist, Reference Manual, Computer Program

Evaluation Method: Observation of Performance

Time to Accomplish: Twenty Hours

Prerequisite Skills:
Basic Math

Prerequisite Knowledge: Knowledge of Safety Rules

Materials Used: Pencil, Paper

Number of Operators: One

Completed Date: July 21, 1990

California Agricultural Marketing Programs

Commodity: Cantaloupes

Legislative authority: California Marketing Act of 1937

Effective date: August 1, 1955

Effective dates of amendments:

Area of application: State except area south and east of San Gorgonio Pass

Authorized provisions: Regulation of grade, size, pack, and containers
Inspection and certification

Seasons in operation: Continuously beginning with 1955

Termination date: Continuous

California Agricultural Marketing Programs

Commodity: Cheeseboroo

Regulating Authority: California Marketing Act of 1937

Effective date: March 1, 1955

Effective Legal Citation:

Type of Application: State except Lake County and part of San Joaquin Area

Authorized Provisions: Advertising (trade, state, use, and promotion
information and certification.

Powers of Operation: Continuously regulated since 1938

Description of Area: Statewide

California Agricultural Marketing Programs

Commodity:	Celery
Legislative authority:	Agricultural Prorate Act of 1933
Effective date:	November 1, 1934
Effective dates of amendments:	
Area of application:	Prorate zone no. 1 Stanislaus, Alameda, San Joaquin, Contra Costa, Solano, Yolo, and Sacramento counties
Authorized provisions:	Volume proration of producer marketings
Seasons in operation:	1936 (Note: Program suspended March 3, 1937. Competition from uncontrolled areas in the state eliminated effectiveness of program provisions.)
Termination date:	July 1, 1943

Confirmed: Virtualization Chapter for Dummies

Document: (Date)

Controlling Authority: Antarctandrel Bureau (A.B.)

Effective date: November 1, 2024

Effective Dates of Successive Versions:

Area of application: Possible case goal
Applies, though, for Google in Santa Clara, Calvin
Airlines. Except for Google in Santa Clara, Calvin
Air. Can accompanied couples

Conditioned restrictions: After the accepting of producer marketing

Removal by operation: [illegible] (Note: Program suspended March 1, 1923. Complaint from Incognito-like mayor in the state elsewhere. "Disappearance of Alcohol (Prohibition).")

Regulation date: July 1, 1923

California Agricultural Marketing Programs

Commodity: Corn, fresh green

Legislative authority: California Marketing Act of 1937

Effective date: September 1, 1947

Effective dates of amendments:

Area of application: Coachella Valley of Riverside County

Authorized provisions: Volume control
Establishment of minimum requirements on grade and length of ear
Inspection and certification
Container and volume requirements

Seasons in operation: 1948-1951, inclusive; partially activated in 1954

Termination date: Inactive after 1954

Effective Date: December 1, 1974

Year of Modification: Completely Revised

Effective Date of Previous Edition: [illegible]

Classification: Semi-Skilled

Duties Performed: [illegible]

California Agricultural Marketing Programs

Commodity: Dates

Legislative authority: California Marketing Act of 1937

Effective date: October 3, 1938

Effective dates of amendments: October 9, 1939; November 4, 1943; September 25, 1947; September 25, 1950; and November 1, 1951
Minor amendments: April 12, 1948 and August 21, 1952

Area of application: State

Authorized provisions: Minimum standards of quality
Substandard pools
Mandatory inspection

Note: The authorized provisions listed above for this commodity program include all of the provisions developed and included at one time or another during the interim period from the effective date of the program to its termination. To determine the provisions authorized for a particular year or season, it is necessary to refer to the program or programs operating for that year or season under the corresponding effective dates of the program and amendments.

Seasons in operation: 1938-1943, inclusive, and 1948-1952, inclusive

Termination date: June 30, 1953

Effective date: June 30, 1999

Areas in Operation: Lyon County, Pine Grove, and Ridge (52), Indiana

Purpose and Scope.

This order is issued under the authority of the Director to declare that a bona fide emergency exists for that area or locality under the circumstances as described in the Director's Order No. 1999-1 dated June 30, 1999, and to provide for the orderly and effective use of the facilities and procedures listed in the Director's Order No. 1999-1 dated June 30, 1999.

Authorized Locations:

Pine Grove Junction
Ozone Springs Depot
Ridge Crossroads (2 doctors)

Hours of Operation: 24-hour

Dear Sir/Madam:

Re: Application for Employment

Please find enclosed my application for employment as a Customer Service Representative at your company. I am very interested in this position and believe that my skills and experience make me a strong candidate for the role.

I have been working in customer service for the past three years, and I have developed a strong ability to communicate with customers and resolve their issues in a timely and efficient manner. I am also very familiar with the software and systems that your company uses, and I am confident that I can quickly learn any new ones that are required.

I am a hard worker and a team player, and I am always willing to go the extra mile to help my customers and my colleagues. I am also very flexible and adaptable, and I am able to work well under pressure.

I would welcome the opportunity to discuss my application with you in more detail. Please feel free to contact me at your convenience.

Thank you for your time and consideration.

Sincerely,

[Your Name]

Enclosure: [Your Resume]

Commodity: Cotton

Importer and Origin: Unknown Destination or Use

Reporting Date: June 15, 1964

Quantity Sold:
Commodity: Cotton (1,000)

Year or Delivery: 1964

Unusual Conditions: Commodity and Price Specific
Unknown Destination or Origin

Export: The exporting corporation cotton sales for June amounted to 1,000 bales to an unknown destination and involved 1964 cotton. It is thought that the sale was to Japan but the corporation refuses to comment further for diverse trade reasons. It is thought that the sale was to Japan because of the previous sale of 1,000 bales to Japan. It is expected that the corporation will continue to sell cotton to Japan in the immediate future. It is expected to enter to the Japanese market for a six month period. The sale was to Japan under the agreement to export cotton to Japan.

Reason for Exemption: Export Sales Reported with Long Lapse Reporting
Only an Exemption until 1965 Upon Change to Lapse Reporting

Commodity or Item: Commodity

Seasons in operation: Continuously beginning with 1938

Termination date: June 30, 1960

California Agricultural Marketing Programs

Commodity: Wine (Processor's Order)

Legislative authority: California Marketing Act of 1937

Effective date: June 20, 1949

Effective dates of amendments: February 6, 1951
Minor amendment: March 15, 1950

Area of application: State

Authorized provisions: Limitation of quantity of wine each processor was permitted to prepare for market
Regulation of marketing of immature wine

Note: The authorized provisions listed above for this commodity program include all of the provisions developed and included at one time or another during the interim period from the effective date of the program to its termination. To determine the provisions authorized for a particular year or season, it is necessary to refer to the program or programs operating for that year or season under the corresponding effective dates of the program and amendments.

Seasons in operation: 1949-1951, inclusive

Termination date: June 30, 1952

(1) Cluster Analysis and Decision Trees

Author: Jan Praskawetz Ofner

Publication Information: Publishing Academia ACC 12 1421

Publication Date: June 30, 1949

Publication Info 2
Publisher: Publishing Academia
Place of Publication: Munich 12, 1920
Date: February 2, 1920

Pages in Publication: Three

Summary of Publication: Identify a quantity of data each processor may:
Define a criteria for merger
Evaluation of suitable of resulting size

Note: The algorithms investigated below for this research project [illegible] all of the heuristics developed and included at the time of publication. [illegible] During the iterative period from the effective date of the [illegible] in its [illegible]. In [illegible] the resulting centralized [illegible] a further year of research, it is necessary to refer to the [illegible] have begun of the problem and assumptions.

Purpose to Generate: Grid-[illegible] Iterative
